

Material

A White Soft PVC film with high plasticizer content for cling applications. Excellent water resistance. The liner is a prime 130 grams cast coated board. The board is printable on the backside.

Basis Weight	317 g/m ²	ISO 536
Caliper	310 µm	ISO 534
Caliper (film only)	150 µm	T411
Density	1.25 gr/cc	ASTM D792
Surface Tension	34 mN/m	measured with test inks

Service temp.	-10 to +70 °C	
Min. Application Temp.	5 °C	
Cling Adhesion	.06 N/25mm	FTM1 on glass

Applications and use

Fasson Static Cling White PVC is a White Vinyl that clings without adhesive on smooth, glossy surfaces like glass, PET, PMMA, PC, Polystyrene and /or even on Gloss paint. It could be easily removed and leaves no residues. However, we do recommend that in combination with laquers and plastics the compatibility has to be tested. The product could be reused / reapplied.

Conversion & printing

The material can be converted by screen printing and UV-flexo.

The surface of the film may be marked by the back side of the release liner, due to time, temperature and roll length. For better gloss and transparency use fresh material and print clear lacquer.

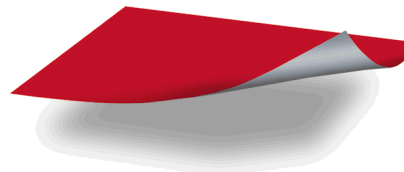

IMPORTANT NOTE: Due to the limited shelf life of this product we recommend to print the material immediately after delivery.

Shelf life

90 days under storage conditions as defined by FINAT (20-25°C; 40-50%RH)

AG625
